

### *Wilmington Tree Commission Internship*

---

The Tree Commission is planning an Urban Forestry Internship program to provide a local degree-seeking student with interest in horticulture, forestry, arboriculture, landscaping, environmental studies, parks/recreation, or closely related field with a unique opportunity. The successful intern candidate selected in a competitive process will be rewarded with a paid internship to mentor with the Urban Forestry Agent on projects designed to improve the urban forest and streetscape within the City of Wilmington. The Commission plans for this to be a regular program with a new intern selected each semester beginning in the Fall of 2006.
